EDUCATION

University of Minnesota

B.S. Computer Science, College of Science and Engineering

Enrolling Fall 2026

Minneapolis, MN

Century College

Transfer Coursework in Computer Science , GPA: 3.84/4.0

Aug. 2025 – Present

White Bear Lake, MN

- Coursework: Discrete Structures, Database Management Systems, OOP, C++, Python

Carnegie Mellon University (Open Learning)

Introduction to Modern AI (10-202) — Prof. Zico Kolter

Jan. 2026 – Present

Remote

- Implemented a minimal LLM from scratch: custom tokenization, self-attention, and fine-tuning in PyTorch

PROJECTS

Park&Go | Python, FastAPI, React, TypeScript, PostgreSQL, MapLibre GL, Docker

Dec. 2025 – Present

- **30+** parking spots ranked per query by distance, cost, and preferences — reduced search time from 15 min to **3.5 min (-75%)**
- Built **12+ REST APIs** with FastAPI handling 200+ daily requests at <300 ms; async SQLAlchemy, Alembic migrations, JWT auth, Docker Compose
- Optimized PostgreSQL queries **65% faster**, supporting 1,000+ spots and 50+ concurrent users at 99% uptime
- Shipped real-time navigation overlay with OSRM routing, travel-time scoring, and 3D MapLibre GL map with live heading arrow
- Wrote 19/19 passing E2E and integration tests covering geolocation mock, nav store state transitions, and ETA population

Text Summarization, Seq2Seq Model | Python, PyTorch, NLTK, NumPy, scikit-learn

Mar. 2026

- Built a Seq2Seq model with **Luong attention**: 3-layer stacked LSTM encoder + 1-layer LSTM decoder trained on **500k+ Amazon food reviews**
- Achieved **90% summarization accuracy**; condenses full reviews to single sentences with minimal loss
- Custom preprocessing pipeline: HTML stripping, contraction expansion, Lancaster stemming, mode-based length selection, and from-scratch word2idx vectorization

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Tools: FastAPI, React, PyTorch, SQLAlchemy, MapLibre GL, Tailwind CSS, Docker, Git

Databases: PostgreSQL, MySQL

Certification: Supervised Machine Learning: Regression & Classification (DeepLearning.AI)

STUDENT INVOLVEMENT

ColorStack

Member

Jan. 2026 – Present

Remote

- Engaged with a national community of 10,000+ Black and Latinx CS students focused on increasing representation in tech
- Collaborated with peers on resume reviews, interview prep, and internship referral pipelines
